

CASE STUDY

Problem Definition- Difficulty Embracing Financial Trends

- Improper planning
- Unforeseen expenditure
- Reporting Issues
- Accounting Complexity

Our client wanted to take a competitive lead with an integrated and complete solution that can help them manage all financial operations.

SOLUTION BY inoday:

We assisted them from Zero to Business Speed and helped them comprehend NetSuite's industry functionality that serves as a foundational technology platform with expansive potential to reduce financial complexities.

We leveraged SuiteSuccess methodology that was live in 4 weeks and helped our client gain enough time for learning the new system.

We helped the company avail oneself of:

- Automated processes, including journal entries creation, amortization and depreciation management, and intercompany transactions.
- A centralized database with reduced risk of error
- Embedded analytics to identify potential development opportunities as well as uncover inefficient processes.
- Embedded analytics to identify potential development opportunities as well as uncover inefficient processes.
- Expense reporting via a mobile app
