

CASE STUDY

Kachnaar

User Brief:

Kachnaar holds a reputed presence in the Fabric design, manufacturing, and trading business.

Challenges:

They needed to implement manufacturing process in Navision 2016. For the most part, they required manufacturing process on schedule and contract basis. Notably, their Main concern was the cost estimation and margin setup.

Solution:

inoday implemented Manufacturing process based on schedules and vendor contract based with variable rates. inoday provided flexibility of process in which the user can skip or pick the service in manufacturing at any stage.

Cost management facilitated using price definition process at different stages to incorporate the process.
