

ERP for Diamond Industry by inoday

SOLUTION FOR B2B & B2C BUSINESS

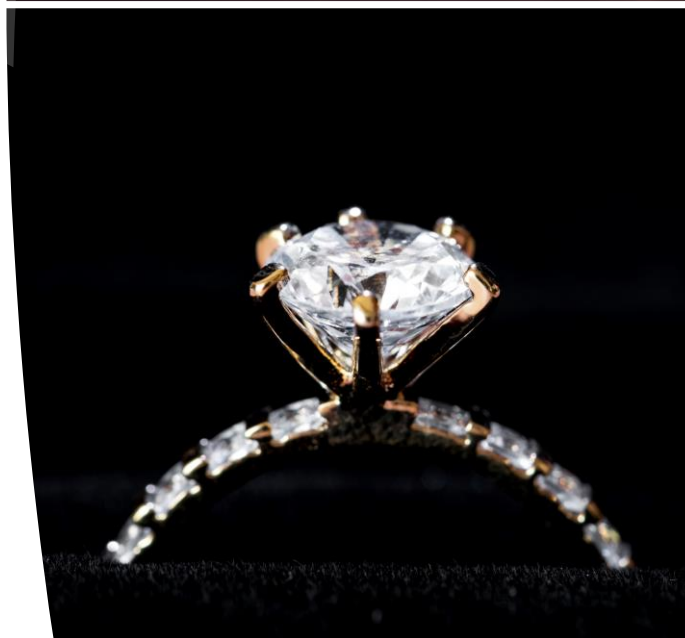

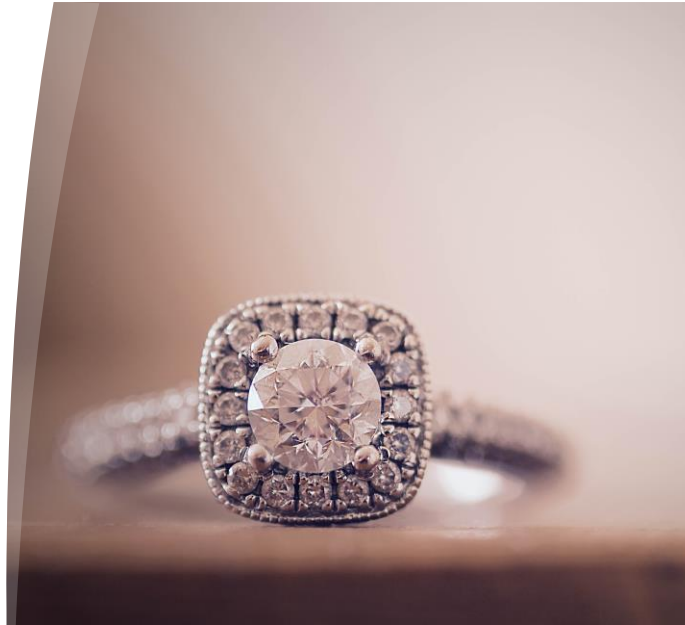

ORACLE NETSUITE
Solution Provider

Problem Statement

1. Item Tracking
2. Scrap Handling
3. Resource Planning
4. Multilevel Job Work
5. Labor & Material Management

Sneak Peak of Diamond Production

1. The diamond industry is very vast industry and have very lengthy procedures to follow to produce a diamond-based product.
 - ▶ Production of Diamond pc for a ring.
 - (a) Marking
 - (b) Cleaving
 - (c) Sawing
 - (d) Girdling
 - (e) Faceting
 - (f) Polishing
 - ▶ To Manage above processes it requires a great time & resource planning in which an ERP can help to accomplish the goal and streamline the lengthy process to smoothie process of work.

ERP can Provide mechanisms to control stock losses by tracking methodology.

Provide micro monitoring of the resources and production.

Provide strong mechanisms of picking & Delivery process with time management.

Provide physical locators of product.

As we can see the above-mentioned process may involve several type of expertise departments to perform their operations and ERP can manage those resources and departments to schedule the processes and do production planning.

ERP can Amaze your Process Production

ERP can help in Production

Production: ERP can help in estimation, analysis, production planning, scheduling, resource/Machines allocation.

Procurement: Stock Forecasting, Consumption Planning, and Stock Tracking.

Subcontracting: ERP can help to handle Subcontracting of production.
